

LEAD DATA ENGINEER

Manager, Data Engineering

Organisation:	Australian Digital Health Agency (ADHA)
Contract Type:	Labour Hire (12 months + 12 month extension)
Location:	QLD, ACT, NSW (Hybrid - 1 day/week on-site)
Start Date:	19 October 2026
Experience Level:	Lead (EL1 equivalent)
Security Clearance:	Must obtain Negative Vetting Level 1 (Active NV1 preferred)

ROLE OVERVIEW

As Manager, Data Engineering, you will be accountable for the leadership, management and delivery of Data Engineering services, capabilities and initiatives at ADHA. You will lead multidisciplinary teams responsible for the design, development, implementation and support of the Agency's data and analytics platforms, ensuring solutions are secure, reliable, scalable and aligned with business and strategic objectives.

Operating in a complex technology environment, you will manage delivery priorities, develop team capability, maintain stakeholder relationships and ensure the successful delivery and operation of data platform services. This role works collaboratively with architecture, reporting and analytics, security and business teams to deliver sustainable and high-quality outcomes.

KEY RESPONSIBILITIES

Leadership & Team Development

Lead Data Engineering teams responsible for delivery, support and continuous improvement of data platform capabilities and services

Manage team workload, priorities and resource allocation to ensure successful delivery of strategic initiatives and operational support activities

Hold accountability for delivery outcomes, team performance and achievement of agreed objectives

Foster a high-performing team culture focused on collaboration, accountability, continuous improvement and customer outcomes

Build capability through coaching, mentoring, performance management and career development

Operational Management

Oversee operational performance, support and maintenance of data and analytics platform services

Ensure appropriate operational processes, support arrangements and service management practices are in place

Lead incident response, problem management and service improvement activities within the team

Monitor platform health, operational risks and service performance, implementing improvements where required

Ensure delivery activities meet security, privacy, governance and operational requirements

Delivery & Stakeholder Engagement

Lead planning and delivery of complex initiatives involving data platforms, cloud technologies, integrations and enterprise systems

Coordinate activities across business stakeholders, technical teams, project managers, vendors and delivery partners

Translate business requirements into deliverable work programs and delivery priorities

Manage risks, issues, dependencies and stakeholder expectations throughout delivery lifecycles

Provide advice and recommendations on delivery priorities, operational considerations and implementation approaches

Technical Leadership

Provide technical leadership and oversight to delivery teams, ensuring solutions align with approved architecture, standards and engineering practices

Drive adoption of technical standards, frameworks and governance processes within Data Engineering delivery teams

Contribute to platform roadmap planning, technical uplift initiatives and continuous improvement activities

Promote modern engineering, operational and delivery practices across the team

REQUIRED QUALIFICATIONS & EXPERIENCE

Demonstrated experience leading technology, data or engineering teams in complex enterprise environments

Experience delivering and supporting data platforms, cloud technologies or enterprise systems

Strong stakeholder management and people leadership capability

Experience managing priorities across operational support, project delivery and strategic initiatives

Tertiary qualification in a relevant technology discipline or equivalent demonstrated experience

TECHNICAL SKILLS

Microsoft Azure

Databricks

WORKING ARRANGEMENTS

Type: Hybrid

Requirements:

Must be in office 1 day per week

Working hours must be within Agency standard working hours (7am-7pm)

Maximum 37.5 hours per week
